

April 30, 2020

PCK Students and Parents,

We hope you all are healthy and happy, and that we will see you all very soon.

We would love to challenge our elementary students to create a story or make a game with [Play Lab](#)! Make animals, pirates, zombies, ninjas, and many more characters move, make sounds, score points, and even throw fireballs! [Instead of playing a game, make the game yourself!](#)

[TypingClub](#) is free, so please encourage 1st-5th grade students to continue working on their keyboarding skills at home. They just need to log in with their school Google credentials to get started.

For our 6th-8th Graders: Please have students prioritize their Core classwork and then complete Tech assignments posted in Google Classroom.

- ★ Sixth Graders have coding lessons due each week on [Tynker.com](#). Students have learned to code games, completed STEM activities, are now learning Javascript, and will finish the quarter with Python.
- ★ Seventh and Eighth Graders are working on their 3D designed house model using SketchUp for Schools. It is an easy introductory activity that boosts creativity and engages students to be innovative. 3D design is a necessary skill for those who want to work in game design, industrial & product design, architectural design, 3D printing, interior design, landscape design, character animation, and film industry pre-visuals just to name a few.

Students are welcome to contact us any time via Gmail, Google Hangouts, or Google Meet to ask questions and get assistance. We love hearing from them!

Sincerely,

Mrs. Henderson & Mrs. White
