January 11, 2021

Dear Families of Remote Learners,

As we reach the halfway point of this school year, I want to take a moment to share information about our upcoming state assessments. Our students are scheduled to take state tests beginning on March 29-April 30, 2021. Students will need to take the state-mandated assessments in person at their home schools. The following grade level and subject tests are currently scheduled to take place:

- **3rd-8th grade** - Colorado Measures of Academic Success (CMAS) for English Language Arts and Math
- **5th, 8th, and 11th grade**-Colorado Measures of Academic Success (CMAS) Science

While there is still uncertainty and ambiguity surrounding how the COVID-19 pandemic will impact this year's instructional settings, a typical state assessment administration season is currently scheduled to resume in Spring 2021 as required by state and federal law. This information is based on current expectations; however with most aspects of education, state assessments may need to be adjusted in response to COVID-19 conditions. We will continue to monitor state and federal assessment requirements and expectations as the school year progresses across Colorado and as COVID-19 responses evolve this year.

For more information about state testing, please visit the State Mandated Assessment page on your home school's website. School specific testing schedules will be posted on school websites by January 2021.

Thank you for your ongoing partnership!

Sincerely,

Johanna Harth  
Vice-Director/Academics
