

November 19, 2020

PCK Families,

The highest priority for our youngest Tech students is working on their keyboarding skills during remote learning. Please see grade-specific websites below.

**1st Graders :** Please have students log-in to [Typing Club Junior](#) to continue with their typing lessons. First graders normally have one 45-minute class per week. Breaking up their keyboarding practice over multiple days would be ideal. The link for Typing Club Junior is available in their Tech Google Classrooms. They sign-in with their school Google credentials and progress through the lessons at their own pace.

**2nd & 3rd Graders:** The link for their typing website is in their Tech Google Classrooms. It is called [Typing Agent](#). Students know how to log-in using their school Google credentials.

**4th & 5th Graders:** These older students work on their typing skills using the [Typing Club](#) website. There is a link in their Tech Google Classrooms. They may also use [Typing.com](#) to play typing games.

**\*6th Graders** should be attending class at their normally scheduled time using the Google Meets posted in Classroom. They are finishing up their Google Sites this week and turning them in.

Please email us with your questions or concerns.

Sincerely,

Mrs. White & Mrs. Henderson
